

EASTASIA TRAINING & CONSULTANCY PTE LTD

Economics Evaluation: Assessing the Costs and Benefits of Health Care Interventions (intermediate level)

1-day Research workshop

Overview:

The aim of this workshop is to examine various ways that health economics research methods can be applied to primary care. Specific areas will include an overview of economic evaluation - the main component of the health economists' "tool box", and the framework that can be applied to most decisions likely to be made in primary care.

Participants:

Clinicians and researchers

Objectives:

After completing this workshop, you should

- Be familiar with the different types of economic evaluation
- Understand the components of valuing costs and benefits
- Be able to identify the main issues when critiquing an economic evaluation

Fees & Registration:

As seats are based on first-come-first-serve basis, please register early to avoid disappointment.

Fees* (in Singapore Dollars) are prepaid before the commencement of the workshop.

*includes course materials, 2 tea breaks and a networking lunch.

Corporations/Private entities	600/delegate
University staff	500/delegate
Students	200/delegate

*We have discounts for group registration. Please email us to have details of the group registration discount package at: enquiry@eastasiatc.com.sg or training@eastasiatc.com.sg
