

Econometrics I

2-Day Professional Development Seminar

East Asia Training & Consultancy Pte Ltd, is happy to invite you to attend a two-day professional development seminar on **Econometrics I** in Singapore.

Description

This seminar focuses on learning and practicing basic econometrics with emphasis on the practice and less emphasis on deep econometric theory. The main purposes of the seminar are to introduce econometric theory at a very basic level and to let you apply the methods with the use of real world data.

Objective

The objective of the seminar is for the student to learn how to conduct – and how to critique – empirical studies in economics and related fields. Accordingly, the emphasis of the seminar is on empirical applications. The mathematics of econometrics will be introduced only as needed and will not be a central focus.

The applied work will be performed using a software program called EViews or STATA. Data sets for the applications will be provided. Participants are advisable to bring their own preinstalled laptops if they wish to try out the applied work during this seminar.

Prerequisite

A prerequisite for this class is basic Statistics or Statistics I, or equivalent. Some review will be provided in class, if required.

Outline*

*(subject to minor changes)

Econometrics I : Introductory Econometrics

- Review of statistics
- Simple regression
- Multiple regression
- Practical Applications
